William O'Connell our computer technician is suggesting people consider purchasing a replacement or repair pack. However, discuss this with the sales staff at JB Hi Fi to ensure it suits your needs. He has also made comment on the capacity of the machines-

"Good" laptop – Good solid computer. Will do the job for web browsing and schoolwork well.

"Better" laptop – Mid range specs. Good laptop which will handle wide range of uses. A very solid machine.

"Best" laptop – Solid Upper-Mid specs. Nice for those willing to spend a little more, should handle everything that'll get thrown at it.

Kind regards,
